

**UNIC Virtual Campus Basic Information and Implementation Overview** 

## **UNIC VC Basics**

#### What we agreed upon

- What virtual campus is not
- What virtual campus is
- Basic set of rules

#### **What UNIC Virtual Campus is not**

- It is not a UNIC web site, it is a set of applications that blend in the UNIC web site
- It does not serve as a place to put news etc.
- It is not a comprehensive database nor it has any intention to be

#### What is UNIC Virtual Campus?

- An information system (database, applications, APIs, procedures, organization, support ...)
- A central hub for data exchange between alliance members
- A support for common UNIC processes
- A central information exchange component of the consortium

#### **Basic set of rules**

- All participating universities has to have an electronical identity provider (IdP)
  - In Croatia: AAI@EduHr
- IdP has to participate in eduGAIN
- All students have to have ESI (European Student Identifier)
  - In Croatia JMBAG serves as ESI
- VC will use ECTS grading scale (A-F) everyone has to know how to convert their grades to ECTS grades

#### Our vision: Main functionalities of the UNIC VC

- Interoperable / acts as a part of UNIC website
- Provides public access to some information as well protected access to authorized users
- Supports:
  - UNIC European Student Card
  - Course catalogue
  - Joint-8 programmes catalogue
  - Virtual mobility course selection, enrolment, grade exchange
  - Open Science Campus (UNIC4ER)
  - •
- Holds minimal set of data in order to support the processes
- Heavily relies on data exchange
  - Most data in the VC should origin in other systems
  - UNIC VC connects the dots, builds the top layer on that available data
  - A small set of data and actions is needed to be done inside the VC apps

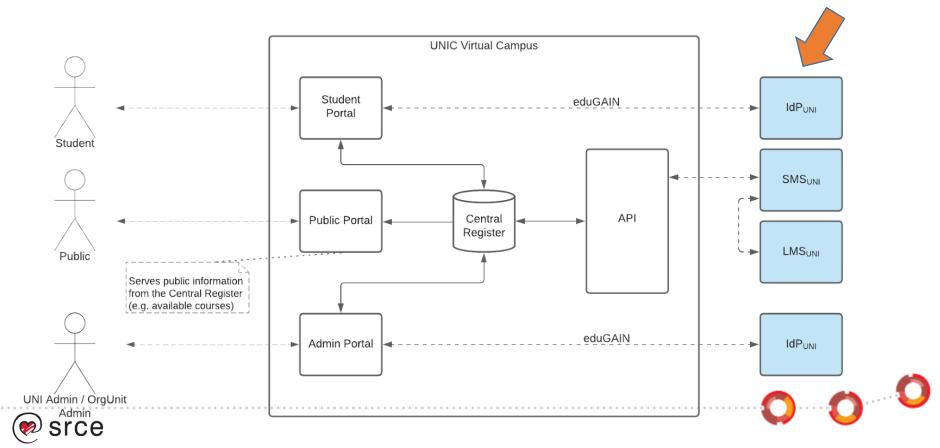

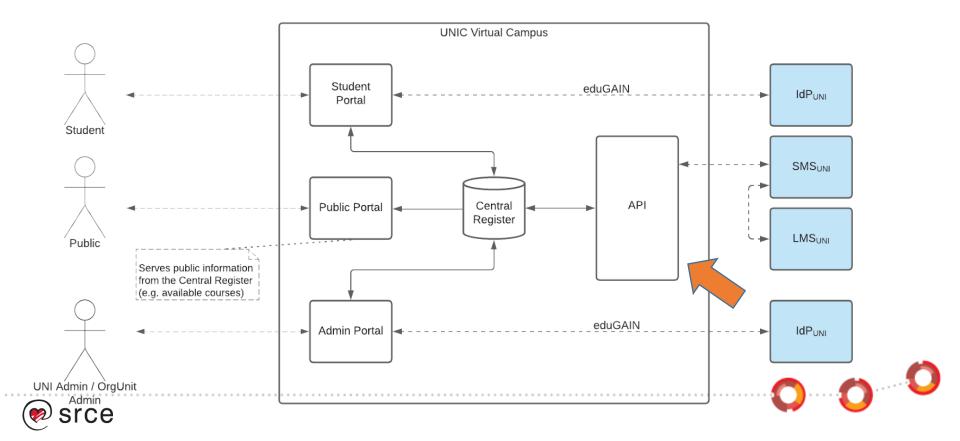

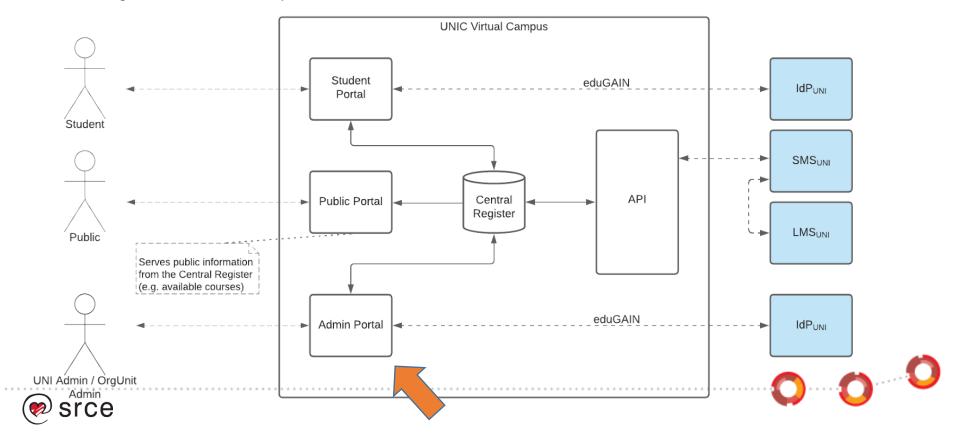

• All users that log in to the system use their own electronical identity (given by the home university)

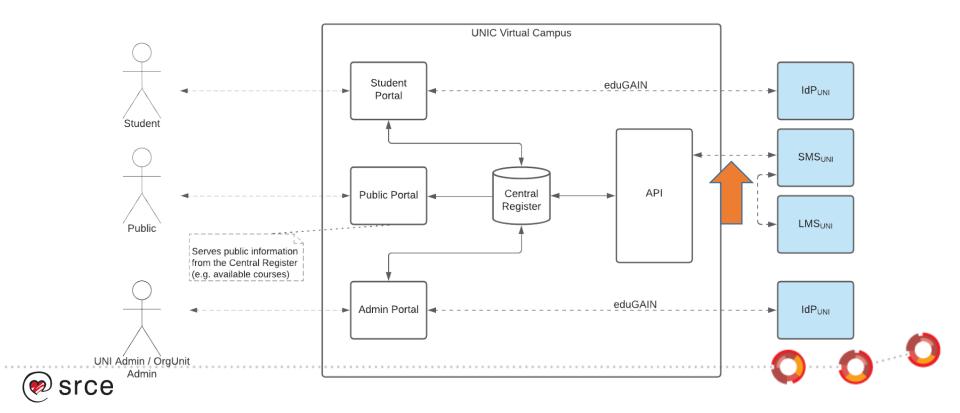

• Provides an API so local student management systems (SMSs) can interact with it and push/pull the data

 Provides web applications through the Admin Portal, so the universities which are not ready for the data exchange can still use the system

• For successful implementation, the link between UNIC VC and local SMSs is crucial

#### **Future outlook (fall 2023)**

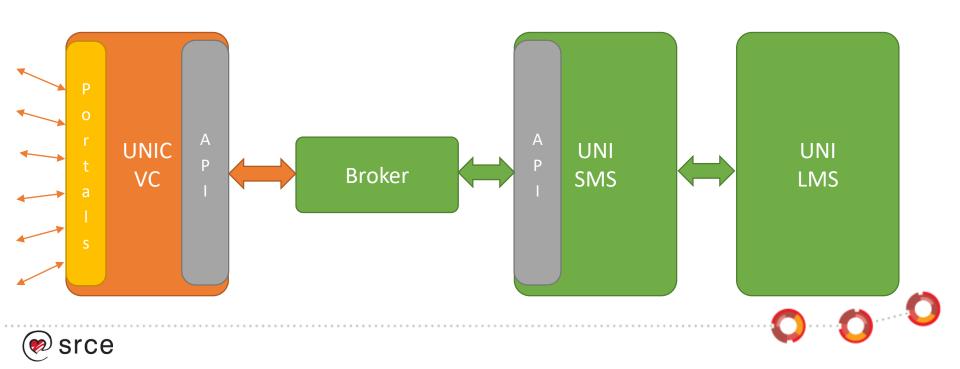

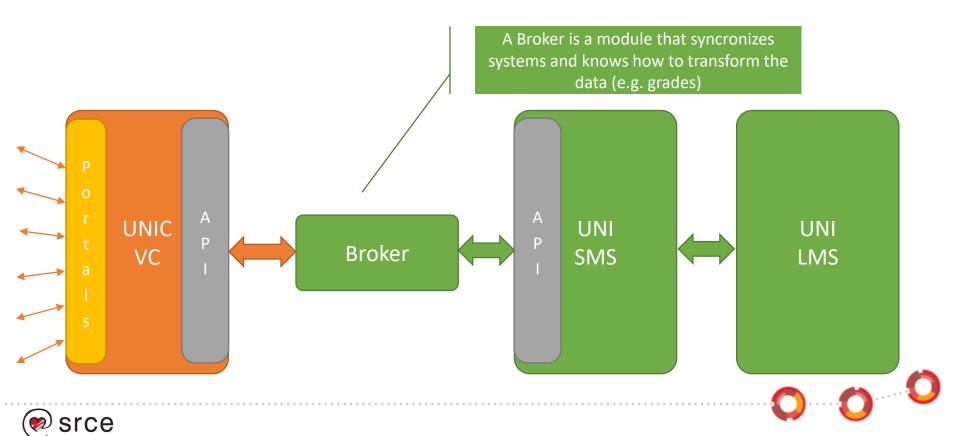

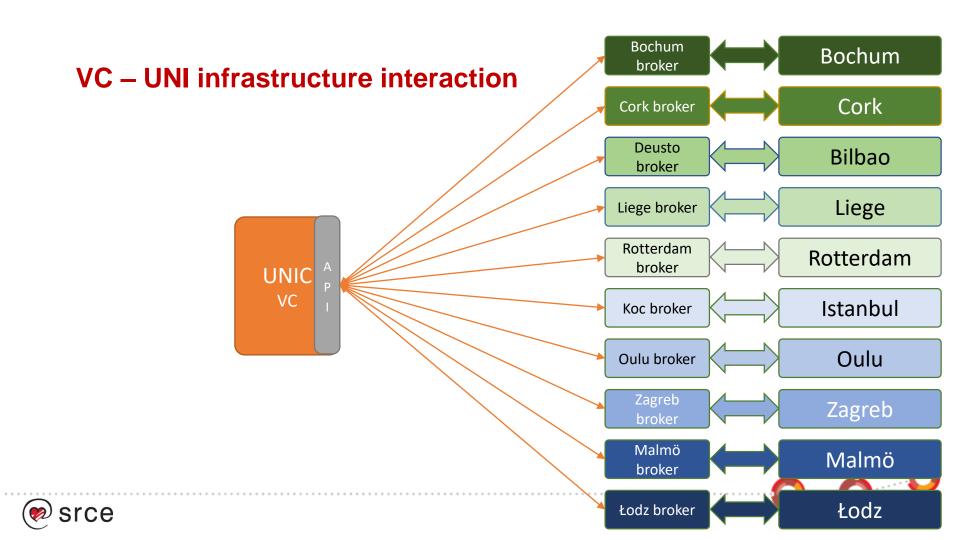

#### **VC – UNI** infrastructure interaction

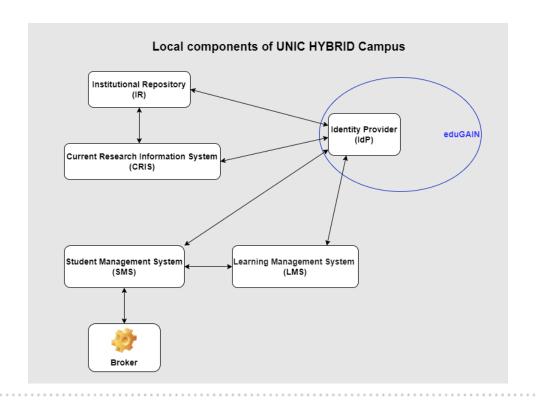

#### **VC – UNI** infrastructure interaction

#### **Local (University level) Components**

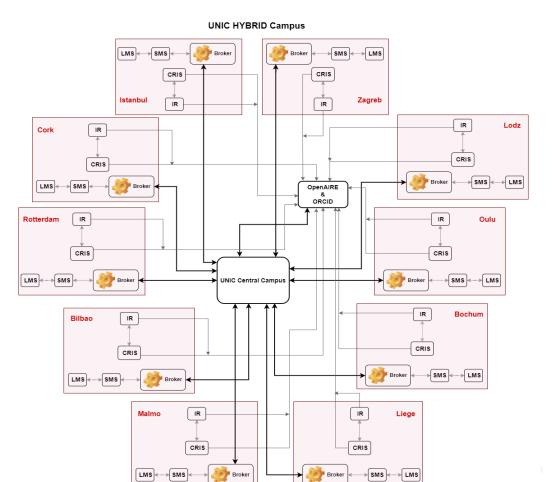

# VC – UNI infrastructure interaction

#### **User roles**

- System administrators
- University administrators
- Organizational unit (faculty, department, ...) administrators
- Students
- Researchers

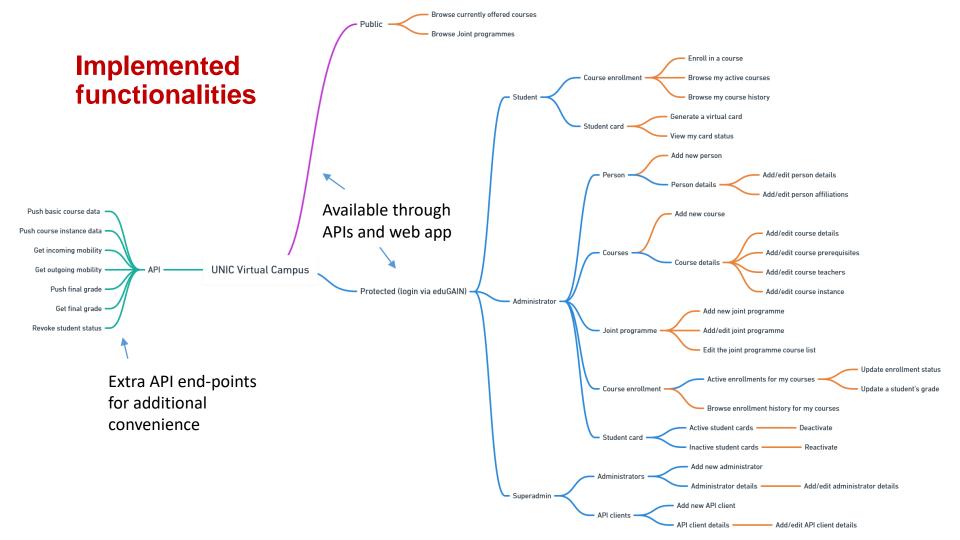

# Functionalities overview and Current status of UNIC VC

#### **VC Supports...**

- UNIC European Student Card
- Course catalogue
- Joint-8 programmes catalogue
- Virtual mobility course selection, enrolment, grade exchange
- Open Science Campus (UNIC4ER)
- ...

#### **VC Supports...**

- UNIC European Student Card
- Course catalogue
- Joint-8 programmes catalogue
- Virtual mobility course selection, enrolment, grade exchange
- Open Science Campus (UNIC4ER)
- ...

- = In development
- = In production

#### **UNIC European Student Card**

- Virtual only
- Can be represented in digital form and carried in a mobile device
- Generated by, stored in and verified by UNIC VC
- Contains minimal set of data related to a student
- Can be revoked or reactivated at any time by an administrator
- Validated by scanning the code on the card

#### **Course catalogue**

- A public list of courses offered by all universities
- Automated entry via APIs (or manual)
- Course data:
  - IDs
  - Name
  - Description
  - URI
  - ISCED code
  - Teachers
  - Prerequisites
  - · Course instances and quotas

#### Joint programmes catalogue

- A public list of programmes and their courses offered by UNIC
- Automated entry via APIs (or manual) of courses
- Manual entry of programmes and course addition
- Programme data:
  - ID
  - Name
  - Administrating university
  - List of courses

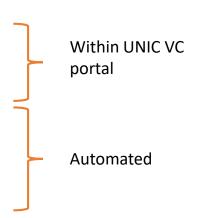

#### Virtual mobility (happy path; example from Oulu to Zagreb)

- Student from Zagreb browses courses and enrols in a one offered by Oulu
- Local administrator from Zagreb checks the prerequisites approves it
- Local administrator from Oulu checks the student application approves it
- Student's data is sent to Oulu SMS
- Student gets the admission to Oulu SMS & LMS
- Student gets the grade (in Oulu SMS), transferred to VC
- Student's grade is transferred from VC to Zagreb SMS

## Current functionalities in the UNIC VC APIs

#### **API**

- Almost everything that can be done in the portals can be done via API
- The goal is to facilitate much more client-friendly API environment
- There are 68 available end-points
- We use swagger docs, which is available at test and production environment

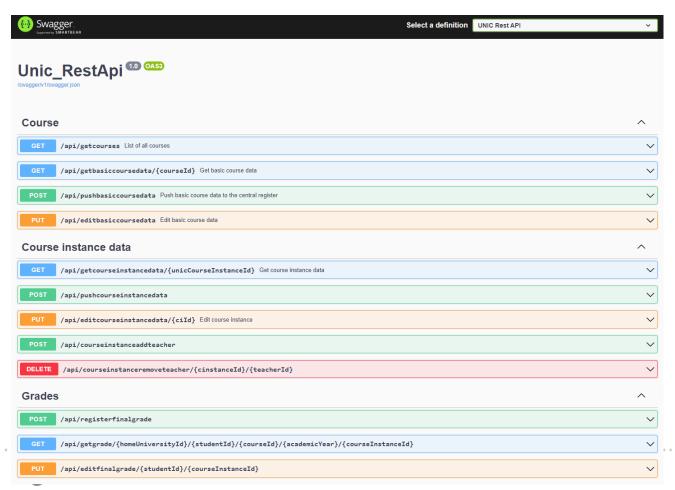

#### **REST API documentation**

#### **REST API documentation – end-points**

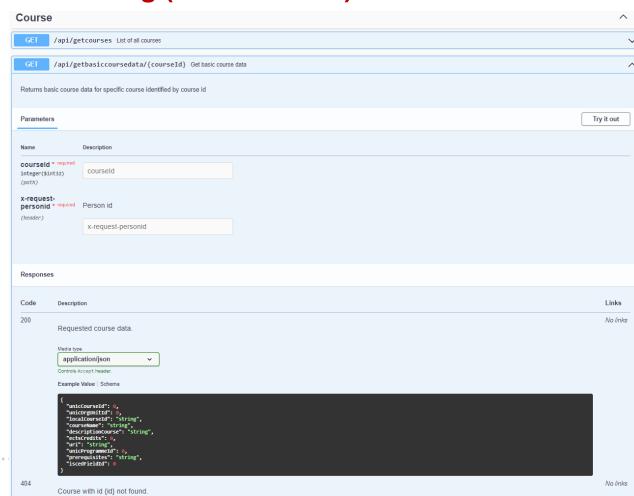

#### **REST API documentation - Schemas**

```
Schemas
                                                                                                                                                                                      \wedge

### **APIs testing (Courses GET)**

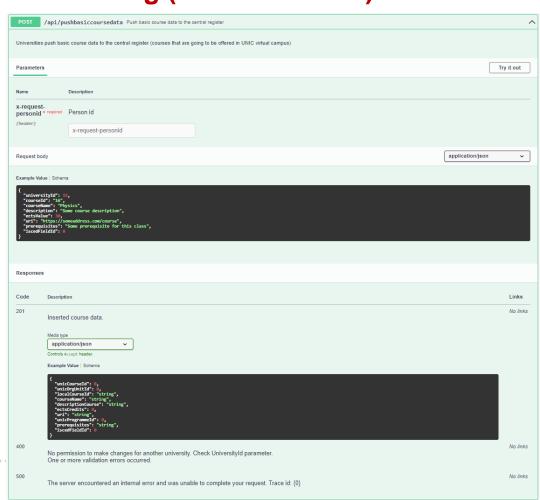

## **APIs testing (Courses POST)**

# Open Science Campus @ UNIC VC

#### **Open Science Campus features**

- Built as a part of UNIC Virtual campus
- Provides a searcheable portal of UNIC open science resources (publication, datasets, etc) to public
- Provides a portal of UNIC researchers and research groups to public
- Promotes open science by linking to important resources (such as Open Science Course built within UNIC4ER project)

#### **Open Science Campus main functionalities (1)**

- Connects periodically to OpenAIRE's
  - Each included repository has to implement OAI-PMH API to be able to share the data to OpenAIRE
    - which they most likely already do;
    - · if not, they should anyway
- Does not provide a web app interface to edit the publication's data.
   All data changes must be done in the original repo

#### **Open Science Campus main functionalities (2)**

- Connects periodically to ORCID via ORCID API and pulls the publicly available information about researchers
- Enables the researcher to log in to UNIC VC Researcher portal
- Enables the researcher to establish a research group and/or join other groups within UNIC

## The operation and the future of VC

#### **Current status of the system operations**

- UNIC VC currently developed and operated by University Computing Centre, University of Zagreb (SRCE)
- 3 different environments development, testing and production
- All set up in SRCE's data centres
- Support available through <u>unicvc-support@srce.hr</u> alias
- SRCE provides the maintenance and the support
- Development and operational costs partly covered by UNIC projects

#### **UNIC 2.0**

- A long term commitment to UNIC VC
  - Support for ICT for all partner UNIs
  - Support for administrators for all partner UNIs
- Further improvement of supported processes (EWP, ESC, ...)

Maintenance, support and operation

#### Thank you
