

Brisanje "snapshota"

Snapshote treba redovito brisati, čim više nisu potrebni. Snapshoti stariji od 2 dana mogu biti obrisani u bilo kojem trenutku.

Za brisanje "snapshota" na poslužitelju na stranici **Service Broker** na tabu Resources potrebno je proširiti strelicu pokraj naziva poslužitelja koji počinje nazivom ustanove (a sadrži još i vrstu resursa i korisničko ime).

The screenshot shows the 'srce Service Broker' interface. The 'Resources' tab is active. The left sidebar has 'Deployments' selected. The main content area is titled 'Deployments' and shows a table with 3 items. The first item is 'Sveučilišni računski centar (Srce)||srce.hr - VPS - @srce.hr - repo.srce.hr'. A red circle highlights the expand icon (three vertical dots) to the left of this item's name.

pa kliknuti na tri točkice pored naziva poslužitelja

The screenshot shows the 'srce Service Broker' interface. The 'Resources' tab is active. The left sidebar has 'Deployments' selected. The main content area is titled 'Deployments' and shows a table with 3 items. The first item is 'Sveučilišni računski centar (Srce)||srce.hr - VPS - @srce.hr - repo.srce.hr'. A red circle highlights the expand icon (three vertical dots) to the left of this item's name. The dropdown menu is open, and 'Delete snapshot' is selected.

a zatim s padajućeg izbornika odabrati **Delete snapshot**.

- Create Snapshot
- Delete
- Delete Snapshot**
- Power Off
- Reboot
- Reset
- Resize
- Resize Boot Disk
