

# Kreiranje "snapshot-a"

Na ovoj stranici:

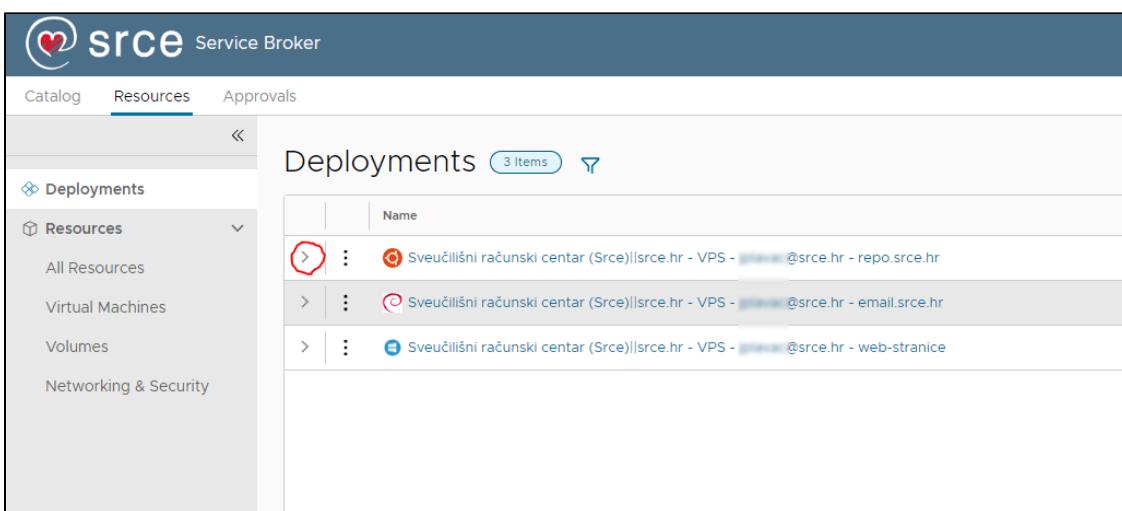

- [O snapshotima](#)
- [Kreiranje snapshota](#)

## O snapshotima

 Snapshote treba redovito brisati, čim više nisu potrebni. Snapshoti stariji od 2 dana mogu biti obrisani u bilo kojem trenutku.

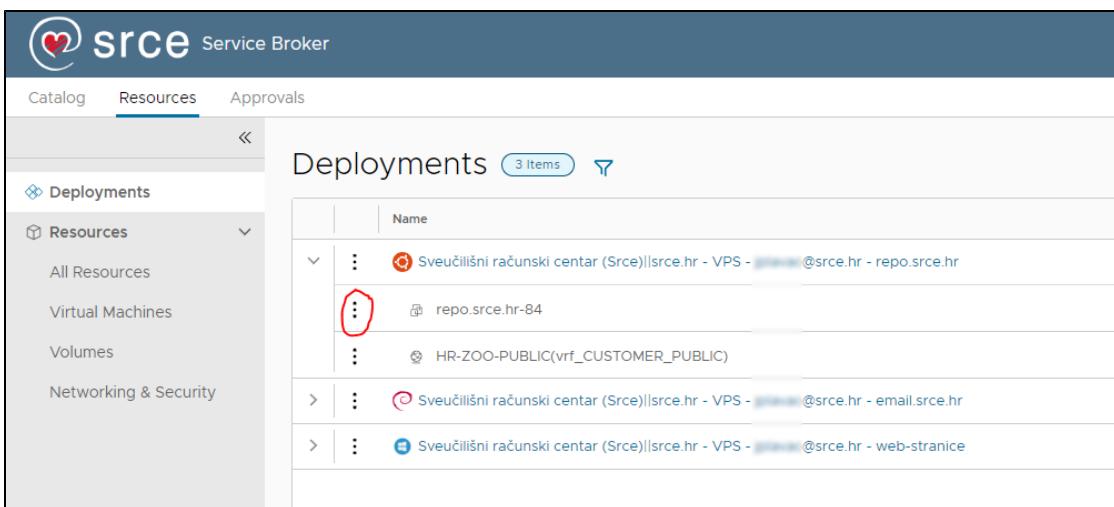

## Kreiranje snapshota

Na stranici **Service Broker** na tabu Resources potrebno je proširiti strelicu pokraj naziva poslužitelja koji počinje nazivom ustanove (a sadrži još i vrstu resursa i korisničko ime)

	Name
> ::	Sveučilišni računski centar (Srce)@srce.hr - VPS - repo.srce.hr
> ::	Sveučilišni računski centar (Srce)@srce.hr - VPS - email.srce.hr
> ::	Sveučilišni računski centar (Srce)@srce.hr - VPS - web-stranice

pa kliknuti na tri točkice pored naziva poslužitelja

	Name
▼ ::	Sveučilišni računski centar (Srce)@srce.hr - VPS - repo.srce.hr
▼ ::	repo.srce.hr-84
▼ ::	HR-ZOO-PUBLIC(vrf_CUSTOMER_PUBLIC)
> ::	Sveučilišni računski centar (Srce)@srce.hr - VPS - email.srce.hr
> ::	Sveučilišni računski centar (Srce)@srce.hr - VPS - web-stranice

a zatim s padajućeg izbornika odabratи **Create Snapshot:**

The screenshot shows the srce Service Broker web interface. The top navigation bar includes links for Catalog, Resources (which is currently selected), and Approvals. On the left, a sidebar menu is open under the Resources category, showing options like All Resources, Virtual Machines, Volumes, and Networking & Security. The main content area is titled "Deployments" and shows a list of items with a count of "3 Items". One item in the list is "repo.srce.hr-84". A context menu is open for this item, listing options such as "Add DISK", "Apply Salt Configuration", "Change Security Groups", "Connect to Remote Console", "Create Snapshot" (which is highlighted with a yellow background), "Delete", "Power Off", "Reboot", and "Reset".

Zatim će se otvoriti ekran u koji treba upisati podatke o novom "snapshotu":

The dialog box is titled "Create Snapshot" and has a sub-title "ubuntu2204". It contains three input fields: "Snapshot Name \*", "Snapshot Description", and "Memory Snapshot" (which is checked). Below the fields are two buttons: "CANCEL" and "SUBMIT".

Stvaranje "snapshot-a" može potrajati nekoliko minuta.
